Front-End Software Engineer

SUMMARY

Results-driven developer with 3+ years of experience creating responsive, high-performance websites that balance design precision with functionality. Skilled in pixel-perfect UIs, performance optimization, and user-focused solutions. With a Computer Science degree, I thrive in fast paced, collaborative environments, delivering scalable, intuitive results. Passionate about building for people, not just screens.

EXPERIENCE

JavaScript Teacher • *Steam Champs*, New York City, USA • Full-time • *Sep 2023 – Feb 2024* • steamchamps.com

- Taught coding fundamentals to children (ages 5-16) through hands-on projects, fostering creativity, teamwork, and critical thinking.
- Designed interactive JavaScript curricula, increasing student engagement by 15%.
- Implemented website enhancements by editing and updating the WordPress site, optimizing functionality and user experience.
- Led weekly STEM mentorship sessions at the Ingersoll Community Center, offering free accessible learning opportunities for underprivileged youth.

Front-End Engineer • *Carre.ai*, Miami, Florida, USA • Remote Contract • *Mar 2023 – Jul 2023* • carre.ai

- Integrated backend APIs to fetch and dynamically display real estate property data, improving platform usability.
- Built scalable and reusable UI components with React, Bootstrap and modern CSS techniques boosting development efficiency and feature deployment.
- Established efficient client-side routing with React Router for smooth navigation.
- Collaborated remotely in an Agile team environment , managing version control and workflow efficiency through Git/GitHub and Slack.

Frontend Web Developer • *Lucky Media*, Dallas, Texas, USA • Full-time • *Nov 2022 – Mar 2023* • luckymedia.dev

- Designed and developed reusable React components, improving frontend maintainability for large-scale projects by 30%.
- Implemented Tailwind CSS to translate Figma designs into pixel-perfect, responsive web experiences with sleek animations, reducing development complexity across devices.
- Built a high-speed static website using Astro, optimizing performance and load times for an improved user experience.
- Collaborated with cross-functional team members to create dynamic Statamic websites, incorporating numerous customizable features to meet client requirements efficiently and successfully.
- Improved visibility and performance in SEO-focused projects, maintaining organized Git workflows for streamlined collaboration.
